RE: PAT Testing in 2018

To whom it may concern.

I have been doing Mr Baxter's Portable Appliances Testing in his 6 Bruntsfield flats for the last 15 years. These are always done at the end of October on instruction from Mr Baxter. I have been contacted by Mr Baxter to clarify the late test in October 2018.

Looking back in my diary I can see it had been arranged to visit all his properties on 26th October 2018 to do all 6 PAT tests.

However, I had a long standing injury with my knee. It was deteriorating and I was having it examined with a view to a probable operation. This operation was eventually carried out some 10 months later.

I had an appointment to see the consultant which conflicted with my arrangement to test Mr Baxter's portable appliances. So the arrangement to test Mr Baxter's appliances was rescheduled to take place after that weekend.

I was not aware of any consequences Mr Baxter might face as a result of me postponing the test for 4 days. If I was aware I would have tried to get a colleague to fill in for me as my appointment with the consultant very important to me.

If you have any questions please call me on 07867904630.

Kind Regards

James Urquhart
